

SRIDEVI T

Senior Full Stack Developer

+91 9449223367 | shreedevi7195@gmail.com | Bangalore, India

PROFESSIONAL SUMMARY

Senior Full Stack Developer with 6+ years of experience building scalable enterprise applications using React.js, Node.js, Express.js, ASP.NET Core, C#, JavaScript, SQL Server, and MongoDB. Proven expertise in designing RESTful APIs, microservices-based architectures, cloud-native applications, authentication systems, and third-party integrations. Experienced in AWS cloud services, Docker, Kubernetes, CI/CD pipelines, and modern software engineering practices. Strong background in delivering high-performance business applications across Travel, CRM, Real Estate, and Healthcare domains while collaborating with cross-functional teams in Agile environments.

TECHNICAL SKILLS

Frontend:	React.js, Redux Toolkit, HTML5, CSS3, Bootstrap, Tailwind CSS, JavaScript (ES6+), Responsive UI
Backend:	Node.js, Express.js, ASP.NET Core ,MVC,C#, VB.NET, REST APIs, JWT Authentication, Micro services.
Databases:	MySQL, SQL Server, MongoDB, Stored Procedures, Redis, Elastic Search
Tools:	Git, Postman, Swagger, Jira, VS Code, Visual Studio, Agile Scrum
Testing:	Jest, NUnit, xUnit, Unit Testing, Integration Testing
Cloud Deployment:	AWS (EC2,S3,Lambda), Docker, Kubernetes, GitHub Actions, CI/CD Pipelines.

PROFESSIONAL EXPERIENCE

Benzy Infotech Pvt Ltd | Senior Software Developer

June 2021 – January 2026

Client: Akbar travels

Tech Stack: React.js, Node.js, Express.js, ASP.NET Core, (C#), Redux Toolkit,Redis, Tailwind CSS, MySQL, JWT, VB.NET, Jest,GitHub, Jira, Docker,Kubernetes, AWS.

Project: Akbar Travels Customer Portal

- Developed and maintained high-traffic travel booking applications using React.js, Node.js, and ASP.NET Core for supporting thousands of B2B and B2C customers.
- Designed and implemented scalable RESTful APIs and Integrated third-party travel APIs for flight search, booking management, fare calculations, cancellations, and refund processing, improving operational efficiency.
- Built reusable React components, custom hooks, and state management solutions using Redux Toolkit.
- Implemented JWT-based authentication, authorization, and secure session management.
- Improved API response times through query optimization, caching strategies using Redis, and backend performance tuning.
- Utilized AWS services including EC2, S3, and Lambda for application hosting, storage, and server less processing.
- Developed unit and integration test cases using Jest to improve application stability and reduce production issues.
- Participated in architecture discussions, code reviews, sprint planning, and production deployments.
- Collaborated with QA teams, business analysts, and stakeholders in Agile/Scrum environments.

Project: Internal AI-Powered Travel Assistant

- Integrated OpenAI APIs to develop an internal AI-powered assistant for travel operations and booking support teams.
- Developed backend services and API integrations to automate internal query resolution.
- Implemented document-based knowledge retrieval and conversational workflows.
- Automated responses to frequently asked operational queries by developing backend services and API integrations, significantly reducing manual support efforts.

Project: B2B Travel Administration Portal

- Developed role-based administrative modules for booking management, reporting, user administration, and operational workflows.
- Built secure backend services using Node.js (Express.js) and ASP.NET Core Web APIs.
- Implemented Role-Based Access Control (RBAC) and JWT authentication for multiple user levels.
- Integrated payment gateway services and third-party business systems.
- Created CI/CD deployment workflows using GitHub Actions and containerized deployments using Docker.

Key Achievements

- Contributed to a live travel platform serving thousands of B2B and B2C customers.
- Improved booking API response times by 35% through backend optimization and query tuning.
- Reduced production support incidents through proactive monitoring, testing, and code quality improvements.
- Mentored junior developers and participated in peer code reviews and technical knowledge-sharing sessions.

Magna Electro Castings Pvt Ltd | Software Developer

March 2019 – May 2021

Clients: Magna Electro Castings, Samrajyaa & Company, Magna Digitech, VR Galaxy, Menorah, Manoj Homes, Sixth Star Technologies, and Dental Avenue.

Tech Stack: ASP.NET Core MVC C#, VB.Net, React.js, Node.js, SQL Server, MongoDB, Bootstrap, Tailwind CSS, JavaScript, GitLab, Docker, Kubernetes, AWS.

Key Projects:

Domain: CRM & Internal Administration Platform

- Developed customer management, lead tracking, employee onboarding, authentication, and task management modules.
- Designed RESTful APIs and backend services using Node.js and ASP.NET Core.
- Implemented secure authentication mechanisms using JWT and Role-Based Access Control (RBAC).
- Developed responsive React.js interfaces and reusable UI components.
- Optimized SQL Server stored procedures and reporting functionality.

Domain: Real Estate Management Portal

- Developed property management, lead generation, inquiry tracking, and reporting modules.
- Integrated third-party APIs and payment processing systems.
- Improved application maintainability through reusable component architecture and modular backend services.
- Participated in database design, API development, testing, and deployment activities.

Domain: Healthcare Management Portal & Corporate Websites

- Developed appointment scheduling, patient management, reporting, and administrative functionalities.
- Built secure APIs and backend services supporting healthcare workflows.
- Developed and maintained multiple corporate websites using React.js, ASP.NET Core, and Node.js.
- Collaborated directly with clients to gather requirements and deliver customized business solutions.

Key Achievements

- Successfully delivered 9+ client projects across manufacturing, healthcare, and real estate industries.
- Improved report generation performance by 40% through SQL query optimization and stored procedure tuning.
- Reduced development effort by creating reusable React.js templates and shared backend modules.
- Contributed to architecture design discussions and implementation of scalable application structures.

EDUCATION

B.E. – Electrical & Electronics Engineering | KSR College of Engineering, Tamil Nadu | 2015 | 70%
